Issue #69 (8 July 2006)

The Yin Wood Goat month has started.
The dominant energies for this month will be Wood and Earth.
This is generally positive as far as the Nasdaq Index goes.

Nasdaq stabilised around the 2100 level, and now seems to be in an upward move again.
July has a positive value in our FPF prediction chart, but will next be followed by two negative months in August and September.

So we look for some kind of top in July, next important bottom and probable buying opportunity in August/September.

Here is our FPF prediction chart for the Nasdaq :

(Predictive chart made with FPF 1.1 software, available at <http://www.fourpillars.net/finance/fpf.php>)

Nasdaq

FPF Index: + 11.6 (up from - 2.3 last month)

Nasdaq briefly fell below 2100 level, and now back near 2200.

We look for some kind of top in July or early August, possibly in the 2200-2300 range.

Next new price weakness in August and September.

There we should either hold in the trendchannel near 2100, or fall further towards the 1800 area (see chart).

This remains to be seen.

If you are still invested in Nasdaq stocks, then use the better days in July to get out at good prices.

Next buy back on expected September lows

In any case, longer term investors should get ready to buy in September.

Here is the updated prediction chart for Nasdaq:

Gold

FPF Index: -36.2 (down from -25.9 last month)

We predicted a possible second drop in gold stocks towards 110 on the XAU.
That's what happened and XAU briefly fell below 120, before rebounding quite strongly.

This market remains very volatile.

We still expect a second peak in the 150's by next August, then a new drop into October/November.
That's when we will look for new purchases in this market.

Here is the updated chart:

Euro - US Dollar

FPF Index: +36.4 (down from +51.9 last month)

A minor correction in the Euro last month, but the uptrend is still very intact.

We still look for higher price by next September.

The FPF prediction chart remains very positive for the Euro, both short and long term.

So, hold on to the Euro.
