Issue #71 (9 September 2006)

The Yin Fire Rooster month has started.
The dominant energies for this month will be Fire and Metal again.
These elements are usually negative for the Nasdaq Index.

Our FPF index reaches its lowest level for the year in September.
So we look for a bottom and probable buying opportunity in September.

Here is our FPF prediction chart for the Nasdaq :

(Predictive chart made with FPF 1.1 software, available at <http://www.fourpillars.net/finance/fpf.php>)

Nasdaq

The Nasdaq has kept up pretty well in August.

The mentioned risk of falling towards 1800 is waning.

I do expect this market to hold in the uptrend channel.

FPF values for October and November will turn positive.

So we can take opportunity to buy Nasdaq market on weak days in September. 2100-2150 area is a good buying target area.

The potential upside is a rise towards 2300-2400 by year end.

Get out if the market drops below 2000.

Here is the updated prediction chart for Nasdaq:

Gold

Gold market continues to behave as expected.

We have reached our sell target above 150 on the XAU.

Projected next bottom time frame is October/November.
We could see prices fall below 140 or even into low 120's (see chart)

If that happens we can look for new purchases in this market.

Here is the updated chart:

Euro - US Dollar

The Euro is acting pretty weak despite positive FPF prediction value.
September is the last month of very positive value.
We could still see a brief jump to 1.31, but it is also possible we start declining without seeing that level.
So I would not bank on it.

Instead stay out.
Our cycles predict a Euro bottom around the end of the year.
I would not be surprised to see something like 1.24 before we can head up again.

Wait and see in this market.
