(6 January 2004)

The new Chinese year of Yang Wood Monkey will start on February 4.

2003 was a good year for stocks. The Nasdaq broke out of its downtrend channel in May and ended the year at the highs.

What about 2004?

Below is the monthly FPF prediction graph for the Nasdaq in 2004.

(Predictive chart made with FPF 1.1 software, available at <http://finance.fourpillars.net>)

The first half of the year has positive energy. The current optimistic mood is likely to hold on for a while. Look for the market to peak during this period. January or April/ May are most likely to see the highs for the year.

The second half of the year is considerably weaker and likely to erase whatever gains we see in the first 5 months. 2004 will be a roller coaster year for stocks, probably ending more or less flat.
